

# Library Orientation for OB/GYN Residents

**Kelsa Bartley, MSI**

**July 9, 2021**

**Calder Medical Library**

# Session Objectives

**Upon completion of this educational activity, participants will be able to:**

- Use the Calder Library website to find:
  - **books and journals**
  - **clinical support information**
  - **bibliographic databases**
- Get a refresher of PICO to create an answerable clinical question for searching databases
- Learn about Clinical Decision Support and Bibliographic databases to find resources on topics of interest
- Explore other useful Calder Library resources
- Contact Calder for help

# Where are we on the Medical Campus

Located directly across from the Rosenstiel Medical Sciences Building, next to the Bascom Palmer Eye Institute.

## Remote Access Request Form

Remote access to the Louis Calder Memorial Library's Licensed Resources (E-journals, E-books and Databases) is restricted to faculty, staff and students at the University of Miami/UHealth/Jackson Health System (JHS). All fields on this form must be completed. Incomplete forms will not be processed.

Applications will not be processed until verification from your residency coordinator is received by the library or copy of a valid UM/JHS photo ID is uploaded.

Do you currently have an account with Calder Library?

Please upload an image file (JPG, PNG) with the front and back of your employee ID.

**If your employee ID is not available, please disregard this step. Will need to verify status with your residency coordinator.**

Front

Drop files or click here to upload

Back

Drop files or click here to upload

# Register your Cane ID at Calder Library

It will take at least 48 hours to process the registration.

- Access to library resources is automatic on medical campus computers (UM).
- Use CaneID and password for Remote Access.

**Renew Remote Access yearly- Online or In person at the library, with UM/Jackson ID.**

**If you have any issues, please contact Access Services at 305-243-6403.**

# What is Evidence Based Medicine?

# Constructing an answerable clinical question

The PICO Principle assists you in organizing and focusing your question into a searchable query.

**P**

Who are the relevant patients?

**I**

What is the management strategy, diagnostic test or exposure that you are researching?

**C**

Is there a control or alternative management strategy, test, or exposure?

**O**

What are the patient-relevant consequences?

## PICO COMPONENTS

### **Patient/Population/Problem/Program:**

Patient characteristics

(primary problem, disease, or co-existing conditions--consider sex, age or race of a patient, if relevant)

### **Intervention, prognostic factor, or exposure:**

Main intervention, prognostic factor, or exposure being considered.

### **Comparison Intervention** (If applicable):

Main alternative being considered to compare with the intervention

(placebo, standard therapy, no treatment, gold standard). Your clinical question does not always need a comparison.

### **Outcome:**

What you hope to accomplish, measure, improve, or affect.

### **Type of Question:**

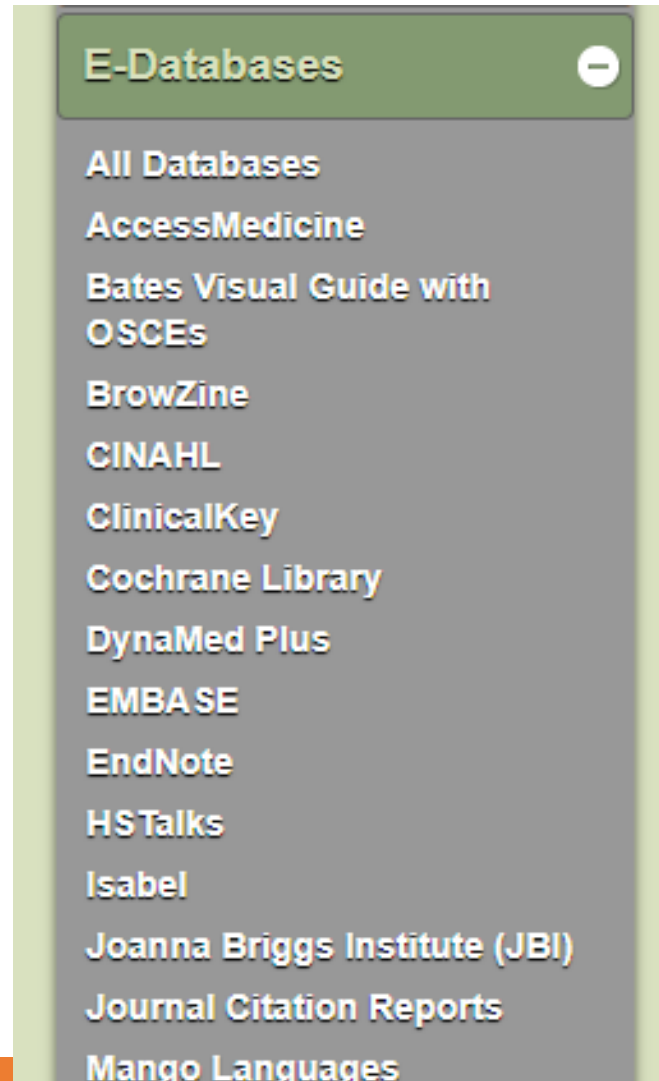

Diagnosis, Therapy, Prognosis, Etiology, Guideline

### **Type of Study:**

Randomized Controlled Trial, Cohort Study, Longitudinal Study, etc.

## Breast Cancer Survivorship: Where Are We Today?

Page 1

Patricia A Ganz<sup>1</sup>, Pamela J Goodwin

Affiliations + expand

PMID: 26059925 DOI: 10.1007/978-3-319-16366-6\_1

### Abstract

Breast cancer is the most common cancer in women, and survivors with this diagnosis account for almost one fourth of the over 14 million cancer survivors in the US. After several decades of basic and clinical trials research, we have learned much about the heterogeneity of breast cancer and have evolved a complex and multidisciplinary treatment approach to the disease. Increasingly, we are paying attention to the long term and late effects of breast cancer treatment, and this is largely the subject of this volume. In this chapter, the authors introduce the topic of breast cancer survivorship and highlight the organization and content of this volume, briefly describing the contents of the subsequent chapters.

# Embase<sup>®</sup>

- International biomedical & pharmacological database
- Strong coverage drug and pharmaceutical research, pharmacology and toxicology
- More than 40 subheadings for different routes of drug administration
- In-depth indexing includes:
  - **drug-disease relationships**
  - **drug-drug interactions**
  - **adverse events**
- Includes important biomedical, drug and medical device conference abstracts

- The largest abstract and citation database of peer-reviewed scientific literature
- Includes scientific journals, books, patents & conference proceedings
- Covers science, mathematics, engineering, technology, health & medicine, social sciences, arts & humanities
- Features include:
  - **cited reference searching**
  - **citation analysis**
  - **h-index for authors**
  - **journal impact factor comparison**

# Cochrane Review Groups

- Provide reliable evidence to make important decisions on healthcare
- Facilitate the identification of reports of clinical trials
- Critically appraise trials for their relevance and quality
- Carry out systematic reviews of available evidence
- Publish their reviews on the Cochrane Library
- Update reviews periodically as new evidence is identified

## Cochrane Children and Families groups

---

The **Cochrane Cystic Fibrosis and Genetic Disorders** group is an international network of healthcare professionals, researchers and consumers preparing, maintaining, and disseminating systematic reviews of randomised control trials for treating cystic fibrosis and other genetic disorders (haemoglobinopathies, coagulopathies and inborn errors of metabolism).

The **Cochrane Fertility Regulation** group addresses the process by which people regulate their fertility, family size and spacing of births.

The **Cochrane Gynaecology and Fertility** group is concerned with the systematic evaluation of the management and treatment of menstrual disorders and subfertility.

The **Cochrane Incontinence** group prepares, maintains, and disseminates systematic reviews of the effectiveness of interventions for incontinence, including prevention, treatment and rehabilitation, concentrating on randomised controlled trials.

The **Cochrane Neonatal** group prepare and disseminate evidence-based, regularly updated reviews of the effects of therapies in neonatal-perinatal medicine (interventions involving the baby during the first month after birth).

The **Cochrane Pregnancy and Childbirth** group focus on interventions involving the mother or baby during and after pregnancy and childbirth (including lactation).

**Cochrane Sexually Transmitted Infections** focus on the prevention, diagnosis, and treatment of sexually transmitted infections and genital tract infections.
